

AMENDMENTS TO THE SPECIFICATION

In the specification, following paragraph number [0011], please add the following new paragraph:

[0011.1] Figure 3A-1 is a block diagram of a modification of the wearable audio device illustrated in Figures 1 and 2.

Please replace paragraph number [0055] with the following amended paragraph. Additions are shown underlined, and deletions are ~~stricken through~~.

[0055] Preferably, the lenses 44, 46 are configured to provide variable light attenuation, such as shown, for example, in FIGs. 3A and in the block diagram of FIG. 3A-1. For example, each of the lenses 44, 46 can comprise a pair of stacked polarized lenses 47, 49, with one of the pair being rotatable relative to the other. In the illustrated embodiment of FIG. 3A-1, a lens support 51 is configured to allow the first lens 47 to pivot relative to the frame between at least first and second positions. The lens 53 provides a first magnitude of light attenuation when the first lens 47 is in a first position and less light attenuation when the first lens 47 is pivoted to the second position. For example, each lens of the stacked pairs can comprise an iodine stained polarizing element. By rotating one lens relative to the other, the alignment of the polar directions of the lenses changes, thereby changing the amount of light that can pass through the pair. U.S. Patent No. 2,237,567 discloses iodine stained polarizers and is hereby expressly incorporated herein by reference. Additionally, rotatable lens designs are disclosed in U.S. Patent No. 4,149,780, which is hereby expressly incorporated herein by reference.
